How it works the FLOWER BAR

1

On the day of your event we head out to our flower fields and pick bucket loads of fresh flowers in every color available

2

Strip and process each stem and fully prepare the all the flowers so that they are ready for arranging

3

We then gather our specially-selected vases and display items and we head to your designated event location to set up.

4

Upon arrival we set up a beautiful show-stopping display of foliage and flowers that are ready for your guests.

5

Each guest then gets to let their creative juices flow while arranging their own bouquet.
